Ravichandra Kadavakuti

Annamayya, Andhra Pradesh, 516269 | Kadavakutiravichandar@gmail.com
https://www.linkedin.com/in/ravichandrakadavakuti | +91 7993091099

Education

CAIIHM	Bangalore, Karnataka
BHM(Bachelor of Hotel Management)	2018 - 2021
Sri Chaitanya	Tirupati, Andhra Pradesh
Intermediate, (MPC)	2016 - 2018
Sri Chaitanya	Rayachoti,Andhra Pradesh
Secondary School Of Certificate	2016

Skills

Front End: HTML, CSS, JavaScript, React.js

Certifications

NxtWave Disruptive Technologies   Apr 2022 - Jan 2023

Continuous Capacity Building program Intensive Bootcamp Trainee

- Able to build impressive Static, Dynamics and Responsive Website using Technologies like HTML,CSS,JAVASCRIPT,REACT.JS

Projects

Insta Share (Instagram Clone) (https://mp02rjskrc.ccbp.tech)

Implemented responsive Streaming Application like Instagram Clone where users can log in and see a list of stories and posts, users can also search posts with post captions, users can be able to like and dislike the post and also view the user specific posts.

- Implemented different routes for features like login, home, user profile, profile by using React Router components Route, Switch, Link.
- Implemented horizontal scrolling (In stories section) using React Third Party library called React Slick.
- Used Figma mockups to implement UI-rich and pixel-perfect React components.
- Used fetch to call REST APIs for authentication, list of posts, user profile, and posts search APIs.
- Implemented username and password authentication and persisted login state using client storage.
- Implemented a protected route to ensure only authenticated users can access the pages like user profile, Home, etc.

Technologies used: HTML, CSS, JavaScript, React JS, React Slick, Figma, client storage

Github Project Link: https://github.com/Ravichandra5266/InstaShareProject

Book Hub (Goodreads Clone) (https://bhrejskrc.ccbp.tech)

Implemented responsive Goodreads Clone where users can log in and see a list of books, bookshelves like all shelves (books sorted by rating), completed reading shelf, currently reading shelf, want to read shelf , and user can also search books with author's name and book's name.

- Implemented different routes for features like login, home, bookshelves by using React Router components Route, Switch, Link.
- Implemented stars (rating), dropdown (select) using React Third Party libraries called React Rating Stars, React Select.
- Used Figma mockups to implement UI-rich and pixel-perfect React components.
- Used fetch to call REST APIs for a list of books, bookshelves details and books search APIs.
- Implemented username and password authentication and persisted login state using client storage.
- Implemented a protected route to ensure only authenticated users can access the pages like home, bookshelves, etc.

Technologies used: HTML, CSS, JavaScript, React JS, React Rating Stars, React Select, Figma, client storage.

Github Project Link: https://github.com/Ravichandra5266/BookHub

Tasty Kitchens (Swiggy/Zomato Clone) (https://tskrjskrc.ccbp.tech)

Implemented a responsive Online Food Ordering System like Swiggy/Zomato where users can see popular restaurants with sort by rating, specific restaurant details, adding or removing food items to cart, and payments section.

- Implemented different routes for features like login, home, specific restaurant details, cart by using React Router components Route, Switch, Link.
- Implemented horizontal scrolling (carousel images on the home page) using React Third Party library called React Slick.
- Used Figma mockups to implement UI-rich and pixel-perfect React components.
- Used fetch to call REST APIs for popular restaurants with sort by, specific restaurant details.
- Implemented username and password authentication and persisted login state using client storage.
- Implemented a protected route to ensure only authenticated users can access the pages like home, specific restaurant details, etc.

Technologies used: HTML, CSS, JavaScript, React JS, React Slick, Figma, client storage.

Github Project Link: https://github.com/Ravichandra5266/Tastykitchen-mini-project

Jobby App (https://jobbykrcrjs.ccbp.tech)

Implemented Jobby App where users can log in and can see a list of jobs with search by Job title, filters based on Salary range and Employment type, etc

- Implemented different pages like Login, Home, Jobs, Job item details using React components, props, state, lists, event handlers, form inputs.
- Authenticating by taking username, password and doing login post HTTP API Call.
- Persisted user login state by keeping jwt token in client storage, Sending it in headers of further API calls to authorize the user.
- Implemented different routes for Login, Home, Jobs, Job item details pages by using React Router components Route, Switch, Link.
- Implemented filters and search text by sending them as query parameters to jobs API calls.
- Redirecting to the login page if the user tries to open Home, Jobs, Job item details routes which need authentication by implementing protected routes.

Technologies used: React JS, JS, CSS, Routing, REST API Calls, Local Storage, JWT Token, Authorization, Authentication
